

Muhammad Uzair Nisar

Full-Stack Software Engineer

CAREER OBJECTIVE

Full Stack Software Engineer with expertise in web and mobile application development. Skilled in creating efficient, scalable solutions using modern technologies and frameworks. Strong track record of collaborating with cross-functional teams to deliver high-quality software products.

Technical Skills

- Frontend: ReactJS, NextJS, TypeScript, AngularJS, Flutter
- Backend: C# .NET, ASP.NET, MVC Framework, NodeJS, Laravel
- Databases: MySQL, MongoDB, SQL Server 2008
- Cloud & Tools: Firebase, Git, GitHub, Git-lab, AWS
- Development Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER

1 October 2021–Present | Biafotech Private Limited, Lahore, PK

- Develop and maintain full-stack applications using C#, ASP.NET, .NET Core, and Angular, alongside React.js, Node.js, and Flutter, to deliver robust, scalable solutions.
- Collaborate with product managers and designers to implement user-centric features, leveraging MVC Framework and WPF for enhanced desktop and web application functionality.
- Design and optimize database structures using SQL Server 2008 or higher, ensuring improved application performance and data integrity.
- Lead troubleshooting and debugging efforts with modern Microsoft tools and techniques, enhancing system reliability and performance across projects.
- Implement best practices and modern development patterns, including Agile methodologies, to streamline workflows and elevate code quality.
- Facilitate cross-team communication to ensure seamless project delivery, supporting global teams and aligning with organizational goals.

EDUCATION

**The University Of Faisalabad,
Faisalabad, Pakistan**

Bachelor of Computer Science,

Project Portfolio

DukaanWala:

- Developed a comprehensive point of sale system using Flutter and Node.js
- Implemented real-time inventory management and sales tracking features

UOL Admission System:

- Built a React.js and Node.js powered admission platform
- Integrated automated application processing and student management features

Work Log:

- Created a time tracking and productivity application using Node.js and React.js
- Implemented features similar to Hubstaff including activity monitoring and reporting

ICAP CRM:

- Developed a Laravel-based Customer Relationship Management system
- Integrated SAP Fiori frontend for enhanced user experience

LCA Mobile App:

- Built a Flutter-based mobile application with Node.js backend
- Implemented complete student and admin portal functionalities

SOFTWARE ENGINEER INTERN

May 2021–September 2021 | Biafotech Private Limited, Lahore, PK

- Assisted in development lifecycle activities, including coding, testing, and debugging, using C#, ASP.NET, and SQL Server to support full-stack application development
- Collaborated with senior engineers on software application maintenance, gaining hands-on experience with .NET Core and Angular for feature updates and bug fixes
- Participated in design discussions and feature implementation, contributing to solutions built with MVC Framework and WPF under senior guidance
- Conducted technical research on emerging technologies, including Microsoft tools and frameworks, to support team innovation and process improvements
- Resolved software issues to optimize application performance, applying debugging techniques and enhancing system reliability
- Demonstrated strong learning ability and adaptability, quickly grasping development processes and best practices in an Agile environment

Cardify:

- Developed a web application for creating customizable digital profile cards
- Implemented user-friendly card creation and sharing features

UOL GymXS:

- Created a gym management system using C#, ASP.NET, .NET CORE and ANGULAR
- Implemented membership tracking and payment processing features

Property Pulse:

- Developed an AngularJS & C#/.NET CORE/ASP.NET-based real estate management platform
- Implemented property listing and management functionalities
